

TOM HUBERT

React / Next.js Developer | Frontend & Full-Stack

Available for full-time employment or freelance work

Email: contact@zerqua.com · Portfolio: <https://zerqua.com> · LinkedIn: <https://www.linkedin.com/in/tom-hubert/> · GitHub: <https://github.com/tomhubert50400>

PROFESSIONAL SUMMARY

Frontend developer with six years of professional experience, specialising in React, Next.js and TypeScript. I also build personal web and mobile products end to end with Node.js, PostgreSQL, Swift and React Native. Comfortable working independently and collaborating remotely in French and English.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML5, CSS3, responsive design, web accessibility, user interfaces, UX/UI, Zustand.

Backend and data: Node.js, REST APIs, API integrations, Supabase, PostgreSQL, SQL, authentication, data management.

Mobile: Swift, SwiftUI, iOS, React Native, Capacitor, hybrid mobile applications.

Tools and practices: Git, GitHub, testing, code review, application maintenance, debugging, performance optimisation, technical documentation, agile methods.

Additional areas: automation, Python, artificial intelligence, data visualisation, mapping, SaaS products, prototyping and MVPs.

Languages: French (native), English (professional bilingual proficiency), Korean (currently learning).

PROFESSIONAL EXPERIENCE

Freelance Developer | Private company engagements and personal products | Alongside employment

- Delivered private engagements for companies, including web interfaces, full-stack features, API integrations, maintenance and production deployment.
- Designed and built personal web and mobile products end to end.

Senior UI Developer | Simform | 2022-2025

- Developed data-rich B2B dashboards with React and TypeScript.
- Contributed to a design system shared across three client projects.
- Collaborated with product, design and development teams in an international environment.

Frontend Developer | GiFi | 2021-2022

- Developed React features for a large consumer e-commerce platform.
- Improved product-listing performance and built internal stock-management tools.

Frontend Developer | MobSuccess | 2019-2021

- Developed web interfaces and contributed to client digital projects.

SELECTED PROJECTS

Watchly | Film and TV Social Tracker

Mobile and web product built with React Native, Expo, NestJS, Prisma, PostgreSQL and Next.js, covering discovery, episode progress, journals, ratings, reviews and shared lists.

Kusodu | iOS Sudoku Application

Native Swift and SwiftUI application published on the App Store, with a local engine, progressive logic hints, statistics and Apple Pencil handwriting recognition.

Cafes in Seoul | Web and Mobile Application

Café discovery application built with Next.js, TypeScript, Supabase, Kakao Maps and Capacitor. Mapping, geolocation, data management and multi-platform deployment.

Draft Predictions | League of Legends Community Game

React, Express, SQLite and WebSocket application for Karmine Corp draft predictions, with Discord authentication, scoring, leaderboards and LoL Esports data.

Portfolio | Interactive Multilingual Portfolio

React and Next.js portfolio in English, French and Korean, with animations, Three.js visuals, a secured contact form and self-hosted deployment.
